

## M.APP ENTERPRISE

M.App Enterprise is an on-premises platform for creating geospatial apps for your organization. M.App Enterprise stores your imagery, vector and point clouds, workflows, analytics, and queries, all accessible in one place from an easy-to-use user interface.

With the M.App Enterprise platform, you can build and deploy your own geospatial applications, called Hexagon Smart M.Apps, to solve your organization's business problems. Hexagon Smart M.Apps are cloud-based targeted, lightweight, and dynamic apps that provide answers and present information in a visual and compelling way.

Smart M.Apps revolutionize the way we envision, experience and communicate geographic information. These targeted information services combine fresh geospatial content and workflows to deliver an interactive experience that includes a map and a dashboard of insightful analytics. Now everyone in an organization can analyze and view the information that is relevant to business success.

M.App Enterprise delivers a privately hosted solution for organizations that want to realize the value of a Smart M.App deployment, but stay within the confines of their enterprise network.

With M.App Enterprise, you can access Smart M.Apps anywhere within your organization's network for real-time answers.

M.App Enterprise delivers a privately hosted Smart M.App solution for organizations that want to realize the value of a Smart M.App deployment, but want to do it on the enterprise network.

## KEY FEATURES

### BUILD THIN-CLIENT, WEB-BASED, OR MOBILE APPS

- Use tools that incorporate the core components of vector, 3D, point clouds, and analytics to create focused apps.
- Create a desktop-like application, browser app or mobile app to provide the best tool based on user requirements. Administrators can also configure different data sources and feature classes, and how each will be distributed.
- Customize off-the-shelf apps if needed by using APIs or SDKs.
- Integrate the apps with your existing enterprise.

### CONFIGURE BUSINESS WORKFLOWS

- Create typical workflows that are run day-to-day in the enterprise environment.
- Implement highly configurable rules for life-cycle workflows, feature-level access control, data validation and behavior, and integration into other systems.
- Edit attributive data with the help of lists and forms.

### CONNECT TO ANY SPATIAL DATA SOURCE

- Because M.App Enterprise is data agnostic, you can connect to any spatial data source to leverage your existing geospatial data.
- Drag-and-drop to configure legends, print layouts, and all other necessary components based on the type of application you want to create.
- Most configurations take only a few minutes to build, and then you are able to view the results immediately.

### ADMINISTER ROLE BASED ACCESS

- Users can easily see and access apps assigned to them.
- Administrators can assign roles, build and customize apps and view statistics.
- User management is available out of the box, or can integrate with your existing authentication system.

## About Hexagon Geospatial

Hexagon Geospatial helps you make sense of the dynamically changing world. Known globally as a maker of leading-edge technology, we enable our customers to easily transform their data into actionable information, shortening the lifecycle from the moment of change to action. Hexagon Geospatial provides the software products and platforms to a large variety of customers through direct sales, channel partners, and Hexagon businesses. For more information, visit [hexagongeospatial.com](http://hexagongeospatial.com) or contact us at [marketing@hexagongeospatial.com](mailto:marketing@hexagongeospatial.com).

Geospatial is part of Hexagon, a leading global provider of information technologies that drive productivity and quality across geospatial and industrial enterprise applications. Hexagon's solutions integrate sensors, software, domain knowledge and customer workflows into intelligent information ecosystems that deliver actionable information. They are used in a broad range of vital industries. Hexagon (Nasdaq Stockholm: HEXA B) has more than 16,000 employees in 46 countries and net sales of approximately 3.4bn USD.
