

Intergraph SG&I and Z/I

GeoSpace is an official distributor of Intergraph Security, Government & Infrastructure (SG&I) and Z/I Imaging products in Africa.

Intergraph SG&I is a leading, global provider of geospatially powered solutions to the defense and intelligence, public safety, government, transportation, photogrammetry, utilities, and communications industries. Our customers rely on Intergraph solutions to organize vast amounts of complex data into understandable visual representations. Through our software, Intergraph customers make better and faster operational decisions vital to the safety and well-being of millions of people around the world each and every day.

GeoMedia, Terrashare and Image Station are some of the more well-known and popular examples of Intergraph software. There is however a whole range of dedicated software products available for the following industries: Defence & Intelligence, Public Safety, Government, Transportation, Photogrammetry, Utilities and Communications. GeoMedia has expanded significantly in recent times. It now includes a suite of modules that can be added to the basic software to provide tailor-made software solutions. This includes Feature Analyst, GeoMedia Parcel Manager, GeoMedia Public Workds, GeoMedia and Transaction Manager. For details the entire suite of products visit <http://www.intergraph.com/sgi/products/default.aspx>. Clients currently include The National Roads Authority (South Africa), Department of Rural Development and Land Reform (South Africa) and National Statistical Agencies.

GeoSpace is also resellers of Intergraph's, industry leading, Z/I Imaging products. This includes the flagship Digital Mapping Camera (DMC®) as well as the RMK D medium format camera system. The hardware is complemented by the suite of software products ensuring the most advanced integrated airborne image acquisition system available. This

includes Z/I Mission, Z/I Inflight and DMC PPS (Post Processing Software).

GeoSpace provides the following services related to Intergraph:

- (If required) we do a situational assessment to provide our client with the best possible advice on system and software requirements.
- Hardware and Software installation.
- Client-specific application development.
- Training.
- Technical support.
- On-line and on-site hardware and software maintenance.

GeoSpace's Intergraph expertise is arguably unrivalled in Africa. We are also the only company that operates two DMC's. We understand the products inside out. Hence we are confident to state that we have the expertise and experience to provide proper advice and after sales service and maintenance on the Intergraph SG&I and Z/I Imaging range of products.

For detailed information on Intergraph SG&I products and services visit: <http://www.intergraph.com/sgi/default.aspx>

For more detail on Z/I Imaging products and services visit <http://www.intergraph.com/photo/ia.aspx> or visit our website for brochures and detailed specifications of the DMC and RMKD.
